

特定非営利活動法人 日本免疫学会
平成 26 年後期 Tadimitsu Kishimoto International Travel Award
研究発表報告書

申請者氏名	James Badger Wing	会員番号	33342
申請者の 所属・職名	Immunology Frontier Research Center, Osaka University Specially Appointed Assistant Professor (Full Time)		
出席会議名	Keystone symposium: T Cells: Regulation and Effector Function (D3)		
発表論文 タイトル	Regulatory T-cells control antigen-specific Tfh expansion and humoral immune responses via CTLA-4.		

実施結果:

I would like to thank the Japanese Society for Immunology (JSI), and the Tadimitsu Kishimoto Foundation for their generosity in awarding me the Tadimitsu Kishimoto International Travel Award to allow me to travel to the Utah, USA to present my work in at the keystone symposium: T-cells Regulation and effector function.

My work was selected for a poster presentation and during the poster session I was able to present my work, recently published in "Immunity" to a large number of interested parties, many of whom gave good feedback and helpful comments. The poster session was well attended and highly interactive, and I had the opportunity to both explain my research to students and also interact with senior scientists within the field.

Aside from the poster session the conference itself was excellent with cutting edge work being presented, giving me several new ideas to improve my own research in Japan. In addition I was able to set up several international collaborations that I believe will be significantly beneficial to my future research in regulatory T-cell biology.

Overall I feel that attending this conference was highly beneficial and I am very grateful to have received the "Tadimitsu Kishimoto International Travel Award" that allowed me to attend this conference.
