

DAY of IMMUNOLOGY 2007

Dear all,

We were pleased by the positive response to our request for feedback. It shows that there is indeed global interest in celebrating the Day of Immunology in 2007. The ideas that we have received are highly diverse. Therefore, it is extremely difficult to choose one topic to the exclusion of other highly interesting proposals.

Our main platform of exchange is the World Wide Web

(www.dayofimmunology.org <<http://www.dayofimmunology.org/>><<http://www.dayofimmunology.org/>>).

In January 2007, we will announce the global Day of Immunology on our website and provide you with a variety of resources and materials to facilitate a successful campaign in your country.

We will keep you informed.

We wish you a joyful holiday season and a Happy New Year.

Looking forward to an eventful global Day of Immunology in 2007.
