

Washington University in St. Louis

Department of Pathology & Immunology

[Postdoctoral Research Training Opportunity](#)

A co-mentored Postdoctoral Fellow position is available immediately in the laboratories of Dr. Marco Colonna and Eugene Oltz at Washington University School of Medicine (<http://immunobiology.wustl.edu/colonna-marco.html> and <https://wupathlabs.wustl.edu/oltz/>). The main project will focus on epigenetic mechanisms governing human ILC and T-helper cell gene expression programs and their functional impact (see *Cell*, **165**:1134, 2016; *Immunity*, **42**:186, 2015; *Nature Immunol.*, **16**:306, 2015). Prior experience in molecular biology is essential. We are particularly interested in candidates with experience in the analysis of chromatin and large “omics” data sets. Other qualifications include a Ph.D. and/or M.D. degree and a strong publication track record. Qualified candidates with interest in this training opportunity should send a curriculum vitae and the names of three references to Ann Winn, Ph.D. at: awinn@wustl.edu
