

Postdoctoral Position available at Shanghai Institute of Immunology, Shanghai Jiao Tong University School of Medicine

Postdoctoral Research Fellow positions are available in the lab of Dr. Jing Wang at Shanghai Institute of Immunology (starts May, 2018). The lab's main research interest is to understand in vivo dynamics and functions of innate immune cells (neutrophils, macrophages etc) during inflammatory responses and how hematopoietic and non-hematopoietic components coordinate in complex tissues and organs.

Qualifications: Candidate should have a Ph.D. in immunology, molecular biology, biochemistry, or related field. The successful candidate should have demonstrated expertise in animal disease models and in immunological techniques, including flow cytometry and immunohistochemistry. Preferred qualifications include an in-depth understanding of innate immune system; myeloid cells; and various microscopic techniques.

Competitive salary and benefits package offered. We offer a highly competitive package based on qualifications with an annual salary as much as 300K RMB and "He Yu Postdoctoral Scholarship".

Interested candidates should submit a CV and contact information for 3 references to Dr. Jing Wang (jingwang@tokushima-u.ac.jp)

About **PI:** Dr. Jing Wang received her Ph.D. in Osaka University, Graduate School of Medicine in 2011, and did her postdoctoral training in the laboratory of Dr. Paul Kubers at University of Calgary until 2016. Dr. Wang has published in top journals including *Science*, *Cell*, *Nature Immunology*, *JEM* and *PNAS*. Publication list can be found here: <https://orcid.org/0000-0001-8758-1693>

About **Shanghai Institute of Immunology:** Shanghai Institute of Immunology (SII) is the first research institute in China dedicating to immunology research and is now affiliating to Shanghai Jiao Tong University. Our institute is located at the heart of Shanghai City with state-of-the-art infrastructure, cutting-edge research programs, and competitive graduate and postdoctoral programs. Researches in SII cover a broad spectrum of immunological topics but focus on a few major directions including mucosal immunology, autoimmunity, tumor immunology and infection immunity et al. Through our basic research in immunology, we're trying to bridge bench and bedside for the benefit of patient care, so that we conduct research in human immunology and clinical immunology together with affiliated hospitals of Shanghai Jiao Tong University as well.
