

Staff Scientist/ Postdoctoral Fellow at OMRF

The Srinivasan Lab at Oklahoma Medical Research Foundation (OMRF) studies lymphedema, a debilitating disease for which there is no cure. The lab uses state of the art technologies to dissect the roles of transcription factors and signaling molecules. We collaborate with numerous internationally recognized investigators thus offering career development opportunities for trainees. Please check our latest publications: **Geng et al** (2016) *Dev Biol.* (cover image) Jan 1;409(1):218-33, **Cha et al** (2016) *Genes Dev.* (cover image) June 16; 30: 1-16, and **Cha et al** (2018) *Cell Reports* (cover image) October 16; 25(3):571-584.

More information about our lab can be found at <https://omrf.org/research-faculty/scientists/srinivasan-sathish/>

We are recruiting highly motivated researchers who are interested in Cell biology and Biochemistry.

Required Qualifications

Ph.D., M.D., or Ph.D./M.D.,

Fresh graduates will be considered for postdoctoral fellowships, and more experienced researchers will be considered for the position of Staff Scientist. Salary of postdoctoral fellows is according to the stipulation of NIH. Salary of the Staff Scientist will be commensurate with experience. Only candidates with at least one first author publication in respected journals of Cell Biology or Biochemistry would be considered for the positions.

Please send CV, list of 3 references, reprints of publications and a brief summary of interests and career goals to Sathish-srinivasan@omrf.org.

OMRF is an independent, not-for-profit, biomedical research institute in Oklahoma City, USA. OMRF has been selected as one of the best research institutions for post-docs from 2011 to 2013 in the USA by The Scientist journal. Oklahoma City metropolitan area offers affordable housing, low cost of living, great public schools and numerous recreational activities. Additional information about OMRF can be found at <http://omrf.com>.
